Patent No : _____

Please be advised that all sensitive information provided to The R&A for consideration, as well as the sample(s) submitted, will be kept in confidence. However, general information and the conformance status of certain products, including images, may be published via the Internet and/or other sources by The R&A at any time after the results of examination and testing have been determined and upon manufacturer's consent or when the product is used or available within the marketplace.

Once a decision has been made, the sample will be retained for reference purposes. Details of the Appeals Procedure are available on request.

Signature of Submitter _____

Title _____ Date _____

Please be sure to complete all relevant sections of this form as failure to do so may delay the decision.

Note 1 : Name, Address and Contact Details of Submitter

It is very important that these details are completed for every submission so that we can ensure our records are up to date. Sometimes, it is necessary for us to contact submitters during the decision-making process, to discuss certain aspects of the design. Therefore, failure to fill in correct contact details may delay the final decision.

Note 2 : General Product Information

Product Name

This is the name that the club will be commonly known by.

Sole Markings

In this section, please describe all of the markings which appear on the sole of the club – including words, numbers and logos. This section is particularly relevant for drivers.

Anticipated Launch/Market Date and Appropriate Date for Listing

This information is important as we would not wish to put a product on a published list of clubs (whether conforming or otherwise) before the launch date.

Production Date

This information is required before we can issue a conformance ruling, as the new specifications on groove area over pitch, sharpness and geometry are only applicable to new models of clubs manufactured after 1 January 2010. Therefore, pre-2010 models will also be evaluated against the pre-2010 Rules.

Note 3 : Special Characteristics

This should describe anything which is unusual about the product, especially features which are not otherwise obvious.

Note 4 : Benefits and Promotional Material

If any information of this type is withheld, submitters should be aware that The R&A reserves the right to withdraw its ruling on a product upon discovery of that additional information.

Note 5 : Submission Type

It is important that we know whether or not a submission is a production sample, and if it is not, at what stage of production the submission is.

When submitting hybrid, utility clubs etc please write this in the 'Other' option.
