

## Aggregates: their availability for golf courses and alternative solutions/products

Start date: 1 January 2020

Project duration: 13 months

The objectives of this project are to:

- Review the requirements of golf courses for aggregates and the specifications of materials for use on golf courses.
- Engage with the aggregates supply trade to assess which have materials suitable for golf course use, what is the geographical spread of these suppliers and the sand suppliers themselves, what materials are available and in what supply, what are typical costs and how long these materials will last.
- Investigate alternative products and/or solutions for dealing with aggregate supply shortages.
- Investigate the impacts and opportunities of using sub-optimal or alternative materials.

This project will be delivered by STRI Ltd.
