

The decision-making process for grass selection

Start date: 1 April 2020

Project duration: 5 months

The objectives of this project are to:

- Create a decision-making process for grass selection for golf courses
- Highlight the relevant factors that influence grass selection
- Assess the key characteristics of grass that relate to grass selection
- Identify key strategic objectives behind grass selection and rationale for change
- Discussion of the main drivers behind grass selection
- Outline the decision-making process for choosing the right grasses for the right situation
- Help greenkeepers and course managers understand what would be appropriate grasses for their course and help them think critically about what grasses they currently have and are they “future proofed”.

This project will be delivered by STRI Ltd.
